- Cradles can be replaced without having to change the base set. No tools needed
- Possesses the e1-type approval required by law
- Supports the charge function for the mobile phone
- Improved transmission and reception performance due to the external antenna\*\*

While it might be compact in design, this universal Plug & Play hands-free kit from the UNI System 8 range still boasts the high product quality that comes as standard at THB Bury.

The entire hands-free kit can be secured in place in the car with only two screws. In this kit the speaker and the electronics are integrated into the docking cradle and, coupled with the microphone that is also supplied, provide for an excellent quality of communication in hands-free phone calls.

The UNI TrendTalk is designed to hold all the mobile phone cradles from the UNI System 8 range. They simply have to be placed onto the docking cradle and clicked in.

*You will find a comprehensive list of the available products on the Internet at [www.thb.de](http://www.thb.de) or by calling the THB hotline on 00800 / 942 468 54 63.
