VoiceTalk BT

Elegant and compact solution for the installation of a hands-free car kit. Thanks to the integrated Bluetooth module, you can telephone with your mobile phone in your bag or pocket. This hands-free car kit does the dialling for you! You can either speak the number to be dialled or set up a connection simply by speaking the name. This function offers maximum convenience and safety as you can keep your hands on the steering wheel.

- Establishes a call by speaking the phone number or the name
- Speaker-independent voice-dialling
- Speaker-dependent directory for up to 45 entries
- Access to mobile phone's internal voice-dial functions*
- Steering wheel remote control for the activation of the voice-dial functions
- Echo and environmental noise suppression with DSP technology
- Can be used with Bluetooth-capable mobile phones of all leading manufacturers
- Perfect voice output thanks to use of vehicle sound system
- Radio-mute function when calling

* if the mobile phone supports this function
